

ONLINE TRUCK DRIVER'S LICENSE COMPREHENSIVE COGNITIVE TEST BATTERY MODEL ACDT-CDL-08-AB

Rapid, Sensitive, & Internet – based Brain Injury, Cognitive Impairment, Cognitive Decline, & Dementia Screening Test for Commercial Driver's License test offices, Lorries and trucking companies

**No software. No CD-ROMs. No downloads.
No special or heavy equipment. No hassles.
Screens & evaluates cognitive abilities prior to road test.
Use your own computer & Internet.
Simply click and connect.™**

Benefits

- Completely online
- Very fast, sensitive, & objective
- Self-service option
- Instant scores & feedback
- Records, prints, & saves results
- Graphics & statistics of data
- Scientifically proven
- Multimedia, interactive, & user-friendly
- Many foreign languages
- Featured in journals & in the News
- Easily exports data
- Touch screen Sytotechnology™ option
- Standardized & paperless tests
- Useful for all ages & cultures
- Satisfies cognition component of Automated Driver's License Test
- Consists of two cognitive tests recommended by NHTSA and American Medical Association for older driver assessment
- Ideal assistive technology
- Optimized for repeated administration
- **Engages people who are unable to draw or write**
- Compliant with 21 CFR Part 11, HIPPA, ICH GCP, & ISO 9001:2000

Online Testing

Each year, millions of clock drawing tests are administered around the world. This battery includes the first and only fully web-based Clock Drawing Test and the Trails A and B Tests, as pioneered by the US Army. This powerful battery includes tests recommended by the American Medical Association and NHTSA to screen the cognitive abilities of older drivers.

The SpecialtyAutomated tool is designed to save commercial driver's license test agencies significant time, labor, and expense to rapidly screen and monitor lorry and truck drivers for brain impairment and dementia. All tests are administered online. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data in real time.

This test significantly reduces wait time and costs associated with the use of other cognitive tests. Studies show that Clock Drawing Test and Trail B Test results correlate with crash risk.

Our cognitive test battery offers great potential for fitness-to-drive evaluations to reduce crashes and high-profiled tragedies involving truck drivers. These tools, and especially our Automatic Clock Drawing Test™, ensure that truck drivers of all ages, cultures, and educational backgrounds will be screened, monitored, and treated fairly and equally.

Start screening and monitoring truck drivers online now using the ACDT-CDL-08-AB.

Screens

cognitive dysfunction • memory • numerical knowledge • visual perception • visual processing • visual attention • selective and divided attention • time conceptualization • visuospatial skills • executive skills
