

ONLINE DRIVER'S LICENSE COMPREHENSIVE COGNITIVE TEST BATTERY MODEL ACDT-DMV-08-AB

Rapid, Sensitive, & Internet-based Brain Injury, Cognitive Impairment, & Dementia Screening Test for Driver's license test offices and other transport licensing agencies by SpecialtyAutomated™

**No software. No CD-ROMs. No downloads.
No special or heavy equipment. No hassles.
Screens & evaluates cognitive abilities prior to road test.
Simply click and connect.™ Use your computer & Internet.**

Benefits

- Completely online
- Very fast, sensitive, & objective
- Self-service option
- Instant scores & feedback
- Records, prints, & saves results
- Graphics & statistics of data
- Scientifically proven
- Multimedia, interactive, & user friendly
- Many foreign languages
- Featured in journals & in the News
- Easily exports data
- Touch screen Sytotechnology™ option
- Standardized & paperless tests
- Useful for all ages & cultures
- Satisfies cognition component of Automated Driver's License Test
- Compliant with 21 CFR Part 11, HIPPA, ICH GCP, & ISO 9001:2000
- Ideal assistive technology
- Includes two very important tests
- Optimized for repeated administration
- Engages people who are unable to draw or write

Online Testing

Each year, millions of clock drawing tests are administered worldwide. This battery includes the first and only *fully web-based* Clock Drawing Test, one of the most widely used cognitive assessment tests in the entire world, and the very popular Online Trail Making Tests™, Part A and Part B, as pioneered by the US Army. This powerful battery is designed to save motor vehicle agencies significant time, labor, and expense to rapidly screen and monitor drivers for brain impairment and dementia. All tests are administered online. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data in real time.

This comprehensive battery effectively reduces wait time and costs associated with the use of other cognitive tests. Studies show that Clock Drawing Test and Trail B Test results correlate with crash risk. The American Medical Association and NHTSA recommend both cognitive tests to assess older drivers.

This low-cost and high-tech tool offers great potential for fitness-to-drive evaluations to reduce crashes and high-profiled tragedies involving dementia drivers. These tools, and especially our Automatic Clock Drawing Test™, ensure that drivers of all ages, cultures, and educational backgrounds will be screened, monitored, and treated fairly and equally.

Start improving safety and testing and monitoring drivers online now using the ACDT-DMV-08-AB.

Screens cognitive dysfunction • memory • numerical knowledge • visual perception • visual processing • visual attention • selective and divided attention • time conceptualization • visuospatial skills • executive skills
