- Engages people who are unable to draw or write

Includes

- Automatic Clock Drawing Test™
- Trail Making Test, Part A
- Trail Making Test, Part B

Online Testing

Each year, millions of clock drawing tests are administered across the world. This is the first and only *fully web-based* Clock Drawing Test, one of the most widely used cognitive assessment tests, combined with two of the most popular cognitive tools pioneered by the US Army, the Trail Making Test Part A and Part B. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data worldwide in real time.

This powerful battery effectively assesses drivers, reduces wait time and costs associated with manual administration, semi-computerization, and use of other cognitive tests. No other tests offer such quick and sensitive, autonomous administration. Studies show that Automatic Clock Drawing Test™ results correlate with crash risk.

Automatic Clock Drawing Tests™ are powerful weapons in the global challenge against brain injury, cognitive impairment, and dementia. Online Trail Making Tests, when combined with the Automatic Clock Drawing Test™ offer great potential for fitness-to-drive evaluations to reduce crashes and save lives.

*Start screening and rehabilitating your drivers
now with the ACDT-MEDI-08-AB-DL.*
