- Trail Making Test, Part A

**Screens** cognitive dysfunction • memory • numerical knowledge • visual perception • visual processing • visual attention • selective and divided attention • time conceptualization • visuospatial skills • executive skills

### Online Testing

Each year, millions of clock drawing tests are administered around the world. This set includes the first and only fully web-based Clock Drawing Test, one of the most widely used cognitive assessment tests in the entire world, and the Trails A Test, another popular cognitive test. This powerful set is designed to save agencies significant time, labor, and expense to rapidly screen and monitor subjects for cognitive decline or impairment. All tests are administered online. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across the world, between agencies and clinicians, in real time.

This set effectively reduces wait time and costs associated with the use of other cognitive tests. Our cognitive test set offers great potential for cognitive evaluations to aid medical decisions. These tools, and especially our Automatic Clock Drawing Test™, ensure that subjects of all ages, cultures, and educational backgrounds will be screened, monitored, and treated fairly and equally. Additional cognitive tests can be added to optimize evaluations.

*Start screening and monitoring cognition online now using the ACDT-MEDI-A-08.*
