

ONLINE TRAIL MAKING TEST AND AUTOMATIC CLOCK DRAWING TEST™

ONLINE COGNITIVE SCREENING TEST BATTERY

MODEL ACDT-MEDI-08-AB

Rapid, Sensitive, & Internet – based Brain Injury, Cognitive Impairment, & Dementia Screening Test for hospitals, clinics, rehabilitation centers, research institutes, and government agencies

**No software. No CD-ROMs. No downloads.
No special or heavy equipment. No hassles.
Screens & evaluates cognitive abilities.
Simply click and connect.™ Use your own computer & Internet.**

Benefits

- Completely online
 - Very fast, sensitive, & objective
 - Self-service option
 - Instant scores & feedback
 - Records, prints, & saves results
 - Graphics & statistics of data
 - Scientifically proven
 - Multimedia, interactive, & user friendly
 - Many foreign languages
 - Easily exports data
 - Touch screen Sytotechnology™ option
 - Standardized & paperless tests
 - Useful for all ages & cultures
 - Consists of three cognitive tests
 - Ideal assistive technology
 - Optimized for repeated administration
 - Compliant with 21 CFR Part 11, HIPPA, ICH GCP, & ISO 9001:2000
- Engages people who are unable to draw or write**

Includes

- Automatic Clock Drawing Test™
- Trail Making Test, Part A
- Trail Making Test, Part B

Online Testing

Each year, millions of clock drawing tests are administered across the world. This is the first and only fully web-based Clock Drawing Test, one of the most widely used cognitive assessment tests, combined with two of the most popular cognitive tools, Trails A and Trails B Tests, as pioneered by the US Army. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data in real time.

This powerful battery effectively reduces wait time and costs associated with manual administration, semi-computerization, and use of other cognitive tests. No other visual attention assessment is as sensitive as the Automatic Clock Drawing Test™. Studies show that Automatic Clock Drawing Test™ results correlate with crash risk.

Automatic Clock Drawing Tests™ are powerful weapons in the global challenge against brain injury, cognitive impairment, and dementia. Online Automatic Clock Drawing Tests™ offer great potential for fitness-to-drive evaluations to reduce crashes. Optional computerized verbal learning and memory tests are available to monitor long-term changes in patients after head injury and to improve the recovery process.

Start screening and rehabilitating your subjects and patients now with the ACDT-MEDI-08-AB.
