- Engages people who are unable to draw or write

Online Testing

Each year, millions of clock drawing tests are administered across the world. This is the first and only fully web-based Clock Drawing Test, one of the most widely used cognitive assessment tests, to serve military and international clientele who know military time, also known as international time. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data in real time.

This test effectively reduces wait time and costs associated with manual administration, semi-computerization, and use of other cognitive tests. No other visual attention assessment is as sensitive as the Automatic Clock Drawing Test™. Studies show that Automatic Clock Drawing Test™ results correlate with crash risk.

Automatic Clock Drawing Tests™ are powerful weapons in the global challenge against brain injury, cognitive impairment, and dementia. Online Automatic Clock Drawing Tests™ offer great potential for fitness-to-drive evaluations to reduce crashes. Optional computerized verbal learning and memory tests are available to monitor long-term changes in patients after head injury and to improve the recovery process.

Start screening and rehabilitating your subjects and patients now with the ACDT-MIL-08.
