

# COMPREHENSIVE ONLINE COGNITIVE TEST BATTERY FOR PILOTS WITH AUTOMATIC CLOCK DRAWING TEST™ AND ONLINE TRAIL MAKING TEST MODEL ACDT-P-08-AB

*Rapid, Sensitive, & Internet – based Brain Injury, Cognitive Impairment Screening Test for worldwide selection, training, testing, monitoring, & rehabilitating of pilots*

No software. No CD-ROMs. No downloads.  
No special or heavy equipment. No hassles.  
Screens & evaluates cognitive abilities prior to flight.  
Simply click and connect.™ Use your computer & Internet.

## Benefits

- Completely online
- Very fast, sensitive, & objective
- Self-service option
- Instant scores & feedback
- Records, prints, & saves results
- Graphics & statistics of data
- Scientifically proven
- Multimedia, interactive, & user friendly
- Many foreign languages
- Featured in journals & in the News
- Easily exports data
- Touch screen Sytotechnology™ option
- Standardized & paperless tests
- Useful for all ages & cultures
- Consists of two cognitive tests recommended by the American Medical Association to assess older drivers
- Ideal assistive technology
- Optimized for repeated administration
- Compliant with 21 CFR Part 11, HIPPA, ICH GCP, & ISO 9001:2000
- Engages people who are unable to draw or write

## Online Testing

Each year, millions of clock drawing tests are administered around the world. This battery includes the first and only fully web-based Clock Drawing Test, one of the most widely used cognitive assessment tests in the entire world, and the very popular Trail Making Test, Part A and Part B. This battery is designed to save airlines significant time, labor, and expense to rapidly and comprehensively screen and monitor pilots for cognitive decline or impairment. Instant scores, reports, statistics, and feedback are provided through this unique online application that enables simultaneous review and comparison of data in real time.

This powerful battery effectively reduces wait time and costs associated with the use of other cognitive tests. Our cognitive test battery offers great potential for fitness-to-fly evaluations to reduce injuries, aid medical decisions, and optimize the performance of pilots.

These tools, and especially our Automatic Clock Drawing Test™, ensure that pilots of all ages, cultures, and educational backgrounds will be screened, monitored, and treated fairly and equally.

*Start screening and monitoring the cognition of pilots online now using the ACDT-P-08-AB.*

**Screens** cognitive dysfunction • memory • numerical knowledge • visual perception • visual processing • visual attention • selective and divided attention • time conceptualization • visuospatial skills • executive skills
