Online Testing

Each year, millions of clock drawing tests are administered worldwide. This battery includes a fully standardized and online Clock Drawing Test. It also includes three online reaction time tests and the Trail Making Test, a popular cognitive test pioneered by the US Army. Our suite of tests is designed to optimize time and management of data collection, processing, and review. The ACDT-RE-08-AB is a high-tech and low-cost tool that rapidly screens and monitors subjects. Instant scores, reports, statistics, and feedback are provided through a unique web-based application that enables simultaneous review and comparison of data in real time.

Automatic Clock Drawing Tests™ offer the option for simple and self-service administration to measure cognition in small and very large populations. No other visual attention assessment is as sensitive as the Automatic Clock Drawing Test™. Studies show that Automatic Clock Drawing Test™ results correlate with crash risk. The battery of tests allows researchers to monitor short-term and long-term changes in subjects anywhere through our unique Internet database and systems. **No other battery compares.**
