

# ONLINE COGNITIVE TEST BATTERY FOR SPORTS

## MODEL ACDT-SM-08

*Rapid, Sensitive, & Internet – based Brain Injury, Cognitive Impairment Screening Test for worldwide selection, training, monitoring, & rehabilitation of athletes*

**No software. No CD-ROMs. No downloads.  
No special or heavy equipment. No hassles.  
Screens & evaluates cognitive abilities prior to sport activity.  
Simply click and connect.™**

### Benefits

- Completely online
- Very fast, sensitive, & objective
- Self-service option
- Instant scores & feedback
- Records, prints, & saves results
- Graphics & statistics of data
- Scientifically proven
- Multimedia & interactive
- User friendly
- Many foreign languages
- Featured in journals & in the News
- Easily exports data
- Touch screen Sytotechnology™ option
- Standardized & paperless tests
- Useful for all ages & cultures
- Consists of two cognitive tests recommended by the American Medical Association
- Ideal assistive technology
- Optimized for repeated administration
- Compliant with 21 CFR Part 11, HIPPA, ICH GCP, & ISO 9001:2000
- **Engages people who are unable to draw or write**

### Online Testing

Each year, millions of clock drawing tests are administered around the world. This battery includes the first and only *fully web-based* Clock Drawing Test, one of the most widely used cognitive assessment tests in the entire world, and the Trails B Test, pioneered by the US Army. This powerful battery is designed to save sport teams significant time, labor, and expense to rapidly screen and monitor athletes for brain injury. All tests are administered online through networked computers and laptops. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across the world, between teams, coaches, and physicians, in real time.

This battery effectively reduces wait time and costs associated with the use of other cognitive tests. Our cognitive test battery offers great potential for fitness-to-play evaluations to reduce injuries, aid medical decisions, and optimize the athletes. These tools, and especially Automatic Clock Drawing Test™, ensure that players of all ages, cultures, and educational backgrounds will be screened, monitored, and treated fairly and equally.

*Start screening and monitoring athletes online now using the ACDT-SM-08.*

### Screens

cognitive dysfunction • memory • numerical knowledge • visual perception • visual processing • visual attention • selective and divided attention • time conceptualization • visuospatial skills • executive skills
