- Touch screen Sytotechnology™ option
- Standardized & paperless tests
- Useful for all ages & cultures
- Compliant with 21 CFR Part 11, HIPPA, ICH GCP, & ISO 9001:2000
- Ideal assistive technology
- Optimized for repeated administration
- Engages people who are unable to draw or write

Online Testing

The Trail Making Test is a widely used cognitive assessment tool pioneered by the US Army. The Trails A Test, often called the Trail Making Test Part A, is a popular test. As an online tool, it is designed to save agencies significant time, labor, and expense to rapidly screen and monitor subjects for cognitive decline, brain injury, or cognitive impairment. Instant scores, reports, statistics, and feedback are provided through this unique web-based application that enables simultaneous review and comparison of data across the world, between agencies and clinicians, in real time.

This test effectively reduces wait time and costs associated with the use of other cognitive tests and other forms of Trails A Tests. It also offers great potential for cognitive evaluations to aid medical decisions, especially when used in conjunction with other cognitive tests.

Start screening and monitoring cognition online now using the TBC-MEDI-A-08.
