- Engages people who are unable to draw or write

**No Internet? No problem. SOFTWARE VERSIONS ARE NOW ALSO AVAILABLE.**

### Online Testing

This Trail-Making Test is a test pioneered by the US Army. The Online Trail Making Test™ contains two popular tests, Part A and Part B. As an online tool, it is designed to save agencies significant time, labor, and expense to rapidly screen and monitor subjects for cognitive decline, brain injury, or cognitive impairment. Instant scores, reports, statistics, and feedback are provided through this unique Internet application that enables simultaneous review and comparison of data across the world in real time.

This test effectively reduces wait time and costs associated with the use of other cognitive tests and other forms of Trail-Making Tests. It also offers great potential for cognitive evaluations to aid medical decisions, especially when used in conjunction with other cognitive tests.

*Start screening and monitoring cognition online now using the TBC-MEDI-AB-08.*

#### Includes

- Trail Making Test, Part A
- Trail Making Test, Part B
